MILBEMYCIN OXIME

(Brand Names: Numerous Brands Including Trifexis, Interceptor, Sentinel, And Others)

STRENGTH: 2.3 mg, 5.75 mg, 11.5 mg, 23 mg Tablets; and an ear product for cats is also available.

ROUTE OF ADMINISTRATION: ORAL (Tablets). May be given with or without food. The ear product is applied into the ear canals for the treatment of ear mites.

ACTION OF MEDICATION: Microcytic Lactone for use against worms and mites.

MOST COMMON SIDE EFFECTS REPORTED: Vomiting is possible. Generally no side effects.

SEVERE SIDE EFFECTS REPORTED: Dogs with the MDR1 mutation may have neurologic side effects if this medication is used at off-label high doses. Routine doses (as according to the label) are not problematic. Shock can result if this product is used in a dog heavily infected with heartworm thus a negative test should be performed prior to use.

STORAGE: Keep away from light and store at room temperature. Do not refrigerate.

IF YOU MISS A DOSE: Do not double up on the next dose. Simply give the medication when it is remembered. Inform your veterinarian that a dose was missed as this could be important depending on the target parasite.

OTHER INFORMATION: This product is approved for puppies age 4 weeks and older as long as they weigh at least 2 lbs and kittens 6 weeks and older as long as they weigh at least 1.5 lbs.
